## The Super IQ Test

How Smart Are You Really?

PHD  
Certified  
PREMIUM TEST

## J-Man5, your IQ score is 147

Your overall intelligence quotient is the result of a scientifically-tested formula based on how many questions you answered correctly. But it's only part of what we learned about you from your answers on the test. We also determined the way you process information.

The way you think about things makes you an **Imaginative Mastermind**.

This means you are an extremely talented person, with a wide range of skills. There is little to nothing you can't do if you want to. You're very creative and you can express your ideas effectively through a variety of different means whether it's written or spoken words, numbers, or anything else. You also have a practical knowledge of how things work in the world — you've been paying attention and you pick things up easily.

How did we determine that your thinking style is that of an **Imaginative Mastermind**? When we examined your test results further, we analyzed how you scored on 8 dimensions of intelligence: spatial, organizational, abstract reasoning, logical, mechanical, verbal, visual and numerical. The 3 dimensions you scored highest on combine to make you an **Imaginative Mastermind**. Only 6 out of 1,000 people have this rare combination of abilities.

**Find out which intelligence dimensions you scored highest on and how your IQ score compares to others in your personalized, 31-page Super IQ Report.**

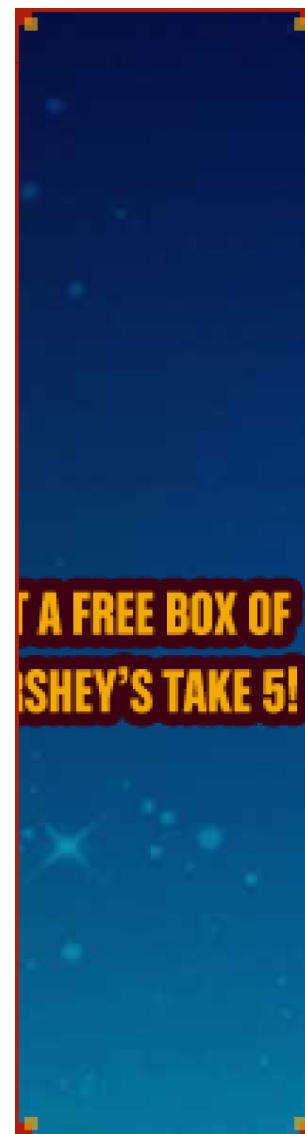

Sample Report

### In your Super IQ Report:

- See your scores in 8 areas of intelligence
- Find out how you compare to other test takers
- Get the complete answer key to all questions
- Read the science behind this test
